3 “Buy Rated” Cleantech ETFs to Own for 2021

[PBW](#) – *As the use of renewable energy is growing, investors are focusing more on the cleantech industry. Given current uncertainties, betting on ETFs with exposure to cleantech stocks is a less risky way to invest in this space. The Invesco WilderHill Clean Energy ETF (PBW), ... , and ... are well positioned to benefit from the cleantech revolution.*

....

So, ‘green energy’ stocks are definitely expected to grow in the future. While it might be risky to bet on a single cleantech stock, ETFs with exposure in this space could be a less-risky option to gain from the impending changes. The Invesco WilderHill Clean Energy ETF (**[PBW](#)** - [Get Rating](#)), ... , and ... should gain with the world striving toward a sustainable future with clean energy.

Invesco WilderHill Clean Energy ETF (**[PBW](#)**)

PBW primarily invests in companies that will substantially benefit from the world transitioning towards a sustainable future through cleaner energy and conservation. With Assets Under Management (AUM) of \$1.1 billion, it’s a unique fund in the sense that it is heavy on tech stocks, spreading the rest of the exposure across other sectors. Its top holding is NIO Inc. ([NIO](#)) which makes up 4.29% of the fund, followed by SunPower Corporation ([SPWR](#)) with a 3.39% weighting and JinkoSolar Holding Company Limited ([JKS](#)), with a 3.37% weighting.

PBW’s expense ratio of 0.70% is a bit higher than the category average of 0.33%. It has returned 127.7% over the past six months, and 119% year-to-date. It pays an annual dividend of \$0.19, which yields 0.26% on the prevailing price. ICLN’s four-year average dividend yield is 1.5%.

PBW has gained 225.5% since hitting its 52-week low of \$22.20 in mid-March.
